Women are Crucial to shaping a Healthier, more Sustainable and Inclusive Future. The 3rd Annual Women4Climate Conference brought Together Global Mayors, Business Leaders, Innovative Change Makers and the Mentees from the Women4Climate Initiative to showcase how Women are taking the Lead when it comes to Climate Action.

Themes for the 2019 Conference were including (Paris City Hall, on February 20 - 21, 2019 - under the Leadership of Anne Hidalgo, Mayor of Paris) :

* The Women4Climate Mentorship Programme: Empowering the Climate Heroines and Women Leaders of Tomorrow.

* The Launch of the Women4Climate Research : Addressing Gender Inequality in Cities around the World throug Inclusive Climate Action Plans.

* The Women4Climate Tech Challenge : Promoting and implementing Innovative Solutions to Climate Change and Air Pollution by Women around the World.

* Inclusive Climate Action & Equitable Cities : Showcasing Women Mayors who are committed to improving the Everyday Lives of their Citizens.

Women make up more than half the World´s population, and although they are often disproportionately impacted by Climate Change, their Voices are not always heard due to Lack of Inclusion and Representation at the Decision-Making Level. Now more than ever, enhancing Women´s Participation and Leadership in the Conversation around Climate Action will be Critical to securing a Healthy, Prosperous and Sustainable Future for us All.

In Recent Years, a Small Number of Extraordinary Women have emerged as Key Leaders on Global Action to tackle Climate Change. However, more generally, Women are Grossly Under-Represented in High-Level Climate Negotiations; tend to be Disproportionately Vulnerable to Climate Impacts ; and Climate Solutions tend to ignore Gender-Specific Issues, perpetuating a General Bias of Infrastructure and Services designed predominantly for Men.

Women´s Organisations and Grass Roots Activism have played Critical Roles in increasing Women´s Representation in, and elevating Gender Issues at, International Climate Negotiations, as well as empowering Women, building Capacity, raising Awareness and mobilising Collective Action. However, these Activities are often undervalued in Discussions about how Cities can deliver on what the Science says we need and avoid Catastrophic Climate Change.

C40 Networks facilitate Dialogue amongst City Officials. This builds Trusted Relationships, which in turn ensures that Ideas, Solutions, Lessons, Questions, and even Friendly Competition can flow Freely and Responsively to Cities' Needs. Rather than end at a Case Study or Report, C40 Networks create Conversations, which enable Cities to tailor their own Actions to their Unique Situations, and band together to use their Collective Power to access Partnership Resources, including Technical and Financial Support. The Result is that Cities' Climate Actions to reduce GHGs and Climate Risks are bolder, more impactful, implemented faster, at a Lower Cost and with less Resources than if they were to go it alone. No other Organisation facilitates such deep Connections amongst City Staff across 50+ Countries, 20 Time Zones and 26 Languages to accelerate Local Action with Major Global Impact.

Women Leaders played a Pivotal Role in negotiating the Paris Agreement on Climate change in 2015. Through the Women4Climate Initiative, C40 aims to : empower and inspire the Next Generation of Climate Leaders through a Global Mentorship Program dedicated

to Women in C40 Cities ; influence the Conversation through Leadership Events and create new Momentum and Interest among Future Leaders ; and raise Awareness through Research on Gender, Cities and Climate to highlight the Key Role Women play in championing Climate Action in Cities.
